Subject:	Add Terms of Service and Privacy Policy to account creation		
Description			
Need to write a new plugin for this. Should work like Drupal Legal Plugin .

An example plugin to look at for implementation ideas - https://github.com/edavis10/redmine_contributor_licensing

Here is a [plugin](#) that demonstrates hooking into the account creation process to extend the profile info. Might also be cool to just add it while we are looking at profile related features.

We will also need to write the ToS. Here is an interesting example where the legal and the layman versions are side by side:

- % Done changed from 0 to 50

Plugin is written and installed (by Littlelines). Still need to develop the actual ToS and post it on the site.

Here are some sample ToS to work from:

- [Wordpress.com ToS](#) (CC-BY-SA)
- [Creative Commons ToS](#) (CC-BY)
- [Source Forge ToS](#) (c) - note, has language about requiring open source licenses

- % Done changed from 50 to 70

Currently reviewing example ToS and should have ODE ToS posted in the next week or so.

- *Status changed from New to In Progress*

- *% Done changed from 70 to 90*

ToS/Privacy policy have been entered into the site, but there are two bugs that need to be fixed.

1. The sign on page is rendering the unformatted text of the ToS instead of the formatted text. That is, one is left with wiki source instead of the formatted ToS.

2. Just discovered there does not appear to be a URL for users to see the ToS other than when they have to agree to it. There should be a rendered view of the ToS at [/legal](#) on the site or something similar.

- *Status changed from In Progress to Resolved*

- *% Done changed from 90 to 100*

Bugs fixed, and ToS added. See <https://opendesignengine.net/terms> for the ToS.
