Subject:	Save filter settings on Activity tab		
Description			
<p>There is no way that I've found to save the filter selection on the "Activity" tab for a project. If these are the same filters used for the "Latest News" section of the "My page" page it might explain why no news shows up for me.</p> <p>!http://innovationsts.com/downloads/mach30/Activity_Tab_Filters.png!</p>			

History

02/12/2012 05:36 pm - J. Simmons

- Target version set to Under consideration

Filing under "Unplanned" for now until we can do some research on what will be required to address this.

Comments

- J - this sounds related to the desire to overhaul the activity (and really "My Page") pages, should be part of larger dashboard overhaul
- Chris - agree with this looks like part of larger issue
