

Open Design Engine - Bug # 122: Remove unused and outdated .gem files from vendor/cache

Status:	New	Priority:	Low
Author:	Kevin Bouwkamp	Category:	
Created:	02/20/2013	Assignee:	Kevin Bouwkamp
Updated:	02/20/2013	Due date:	
Subject:	Remove unused and outdated .gem files from vendor/cache		
Description			
<p>While going through a standard ODE development setup, this is printed out at the end of a successful `bundle`:</p> <p>Removing outdated .gem files from vendor/cache * rails-2.3.11.gem * actionpack-2.3.11.gem * rack-1.1.2.gem * activerecord-2.3.11.gem * actionmailer-2.3.11.gem * actionmailer-2.3.15.gem * activesupport-2.3.15.gem * activerecord-2.3.15.gem * actionpack-2.3.15.gem * rails-2.3.15.gem * activerecord-2.3.11.gem * activesupport-2.3.11.gem * rack-1.1.4.gem * activerecord-2.3.15.gem</p> <p>This is due to the recent updates to rails and friends. We should remove these files from the repository, just to keep things squeaky clean.</p>
