

Epoxy Granite CNC Mill - Feature # 67: Vacuum

Status:	New	Priority:	Normal
Author:	Brandin Watson	Category:	
Created:	07/13/2012	Assignee:	Trenton Wilson
Updated:	07/13/2012	Due date:	08/11/2012
Subject:	Vacuum		
Description			
<p>We need to create a vacuuming system to mitigate air bubbles in the epoxy granite. It needs to be able to fit around the assembled mold.</p> <p>The cured EG may work perfectly for our purposes even with some bubbles but it is better safe than sorry.</p>
