Updated:	10/10/2013	Due date:	
Subject:	Modernize ODE theme		
Description			
<p>The available themes for Redmine are basically variations on the default theme. It is time to update the look to a more modern feel and layout. Here are some examples to look at or base research on:</p> <ul style="list-style-type: none">- Thingiverse - A kind of ODE for projects or parts developed by single users- Little Stream Software - A custom install of Redmine with an updated and clean theme- Experimental Theme - Source code is available, but is not under active development and requires modifications to the Redmine core. Might be an interesting place to start. <p>See attached file for some more ideas about the layout and flow that should be included in the new theme.</p>			

History

04/08/2011 03:15 am - J. Simmons

- Target version set to v0.2 - Public Beta

If at all possible, would like to see this in v0.2.

05/12/2011 03:18 pm - J. Simmons

- Target version changed from v0.2 - Public Beta to v0.3 - Sustainability Enhancements

10/10/2013 01:45 pm - J. Simmons

Blog post with many examples of good modern web design - <http://mashable.com/2013/10/09/web-design-inspiration-2/>
