

Open Design Engine - Feature # 183: Include the ability to embed references to other OSHW projects in BoM module

Status:	New	Priority:	Normal
Author:	J. Simmons	Category:	
Created:	09/18/2013	Assignee:	
Updated:	11/07/2013	Due date:	
Subject:	Include the ability to embed references to other OSHW projects in BoM module		
Description			
As OSHW projects grow in scale and complexity, some projects will become components of other projects (Thingiverse objects come to mind as an example). Bill of Materials components should be able to easily point at OSHW projects as components and take advantage of metadata from the source sites.
