

Open Design Engine - Bug # 66: Getting https error when embedding YouTube videos

Status:	Resolved	Priority:	Normal
Author:	J. Simmons	Category:	
Created:	06/14/2012	Assignee:	J. Simmons
Updated:	11/04/2012	Due date:	
Subject:	Getting https error when embedding YouTube videos		
Description			
<p>Visit the Far Horizons Project Wiki Page to see the error. Error confirmed in Chrome and IE 9. Error message is "This page has insecure content".</p> <p>It looks like there is a new option with embedding YouTube videos for HTTPS sites. See "Enabling HTTPS mode" on this page. We should update the Youtube/Vimeo plugin to work with this feature (and check Vimeo videos for similar problem).</p>

Also need to check the Donation Drive Plugin for similar bugs.

Confirmed the error is in the embed code being generated by the plugin. Currently fixed for youtube with a hack to the running source code. Need to go back in the svn repo and put an actual patch in place for youtube (note, would like to use Redmine protocol setting to determine whether we should use http or https). Still need to address the ChipIn Badge (other related wiki enhancements appear to be fine).

Youtube and Chipin were the only widgets to have problems. Youtube is fixed, and Chipin does not work at all anymore. Filing new issue about Chipin, but we may just drop support for it since it looks like it is not longer being used.
