

## Open Design Engine - Feature # 185: Add video conferencing support

<b>Status:</b>	New	<b>Priority:</b>	Normal
<b>Author:</b>	J. Simmons	<b>Category:</b>	
<b>Created:</b>	09/18/2013	<b>Assignee:</b>	
<b>Updated:</b>	09/20/2013	<b>Due date:</b>	
<b>Subject:</b>	Add video conferencing support		
<b>Description</b>			
This is another communication channel users currently have to go outside of ODE for. From Mach 30's experience with Google+ Hangouts, team meetings over video conferencing can really help distributed teams coordinate their activities.

We've had some discussion elsewhere about Big Blue Button for this purpose, and there's already a Redmine plugin for it. I have no idea of the viability of the plugin though. <http://www.redmine.org/projects/redmine/wiki/PluginBBB>

From what I have seen, my guess is the BBB plugin needs some work. It did not look like it was a very integrated plugin, more of a link to a BBB server. I would want to see user account integration at a minimum, and I haven't been able to tell if that is in the plugin.
