<b>Subject:</b>	Allow Users to Accept or Reject Project "Invitations"		
<b>Description</b>			
<p>I was added to a project today by someone else, and it got me thinking. There's no confirmation that I've ever seen when you're added to a project, and you don't get a chance to decline the invitation. That means you could be added to a project unknowingly, even a project that you don't want to be associated with, without your knowledge or warning. This isn't a big deal now, but if/when ODE grows into the SoureForge of the hardware world, it may become an issue.</p>
