Cubicati	Add a "wirerd" made for the Changed CIII			

Subject: Add a "wizard" mode for the Shepard GUI

Description

The current GUI is set up in more of an "expert" format, where all of the options for controlling the hardware and GUI are immediately available. It would be good for many situations though to have the control options simplified into a guided, step-by-step format. The steps would be:

- 1. Connect
- 2. Calibrate
- 3. Set Test Notations
- 4. Record
- 5. Stop Recording
- 6. Clear

After the last step, this test "wizard" would put the user back at step 3 for another test.
