Subject:	No Notification of Comments on News Items		

Description

I have my email notifications set to "For any event on all my projects", but a comment was posted to one of my dev logs (using the news module) and I never got any notification. I checked and it did not go to spam. Is there a separate setting somewhere for this? If not, I would like to add it as a feature request.

History

05/22/2013 01:05 pm - J. Simmons

- Priority changed from Low to Normal

- Target version set to v0.3 - Sustainability Enhancements

Note, we should investigate this behavior in the latest Redmine release to see if it is something that will be addresses by the next update from their trunk.

05/22/2013 03:29 pm - Jeremy Wright

Is Chris' update of ODE to the latest version of Redmine to the point where we could test this?
