Updated:	05/15/2011	**Due date:**	
Subject:	Automatically create SVN Repositories when Repository module is turned on		

Description

See http://www.redmine.org/projects/redmine/wiki/HowTo_Automate_repository_creation for instructions. It would be best if the configuration could be packaged with the distribution (at least for installation in Bitnami hosts).

History

05/08/2011 05:44 am - J. Simmons

- Status changed from New to In Progress

- Assignee set to J. Simmons

First pass at testing on demo box complete. Next step is to document in wiki using clean test server. If that works well, will implement on live server (after a backup of course).

05/08/2011 05:48 am - J. Simmons

- Assignee deleted (J. Simmons)

05/08/2011 05:48 am - J. Simmons

- Assignee set to J. Simmons

05/08/2011 06:36 pm - J. Simmons

The process has been documented in the [[Installation Instructions]], and tested on a clean VM. Should be ready to put onto live server in the next 24 hours.

05/09/2011 01:32 pm - J. Simmons

- % Done changed from 0 to 50

05/15/2011 10:31 pm - J. Simmons

- Status changed from In Progress to Closed

Configuration changes complete, per [[Installation Instructions]]. To use, simply create a project and activate the Repository module. Within two minutes the repository will be created at http://opendesignengine.net/svn/(project_name).
