Open Design Engine - Bug # 249: Receive 403 Error After Creating New Project

Status:	Closed	**Priority:**	Normal
Author:	Jeremy Wright	**Category:**	
Created:	07/09/2014	**Assignee:**	Jeremy Wright
Updated:	09/02/2014	**Due date:**	
Subject:	Receive 403 Error After Creating New Project		

Description

OS: Linux (Ubuntu 14.04)
Browser: Chrome 35.0.1916.153

After clicking the "Create" button on a new project, I see a 403 (not authorized) message (see attached image).

History

07/09/2014 01:33 pm - Jeremy Wright

I just noticed that the project is created and shows up in the project list, and I can get to the settings page after it's been created.

07/09/2014 01:39 pm - Jeremy Wright

Clicking the "Create and Continue" button does not cause the error, presumably because it does not forward me to the settings page for the project.

07/09/2014 01:56 pm - Jeremy Wright

This also happens in Firefox 30.0 on Ubuntu 14.04.

07/10/2014 09:44 pm - Christopher Sigman

This appears to be in all browsers.

07/27/2014 11:11 am - Christopher Sigman

I've finally tracked down what the overall issue with this is. It seems in this version of Redmine, after a new project is created the cached project memberships for the user is not updated. I'll be looking in to whether this is fixed in newer versions of Redmine a little bit, but ultimately submit a patch to our current copy to resolve the issue (not update to a newer version of Redmine; that will be a future task).

- Status changed from New to In Progress

07/27/2014 02:16 pm - Christopher Sigman

As far as I can tell without actually standing up and configuring a new instance of Redmine, it looks like this would be an issue with the latest as well.

- Status changed from In Progress to Feedback

- Assignee set to Jeremy Wright

Posted a fix under SVN, revision 82. Updated the test server, so this should be good to go to verify it's working (which it seems to be on my end).

07/28/2014 06:50 am - Jeremy Wright

Now when I click the Create button, Firefox and Chrome both get stuck waiting for the server. It never redirects to the settings page, the loading indicator(s) just spin forever.

OS: Ubuntu 14.04

07/28/2014 06:54 am - Jeremy Wright

I cleared the browser cache on Chrome just to make sure that wasn't the problem. It still says that it's waiting for the server forever.

07/28/2014 09:21 am - Christopher Sigman

I think it getting stuck is some how related to the validation bug fix. When I updated the test server yesterday with that fix it started to hang on new project creation. Oddly, reverting that change didn't seem to fix it. I'll update this ticket when that issue appears to be resolved.

- Status changed from In Progress to Feedback

- Assignee changed from Christopher Sigman to Jeremy Wright

r84 just pushed to test should fix the lingering issues.

07/29/2014 06:27 pm - Christopher Sigman

- Target version set to v0.2.1 - Public Beta Enhancements

09/02/2014 08:37 am - Christopher Sigman

- Status changed from Feedback to Closed

09/02/2014 10:25 am - Christopher Sigman

- Parent task set to #217
