Updated:	03/08/2013	**Due date:**	
Subject:	Git hosting is not working		

Description

Git repositories can be created, but not accessed. Need to figure out how to host the git repositories over https like we have done for svn. Next step is to consult with Bitnami docs and forums about a solutions.

History

11/04/2012 06:46 pm - J. Simmons

- Target version changed from v0.2 - Public Beta to v0.2.1 - Public Beta Enhancements

Moving to v0.2.1. We need to figure out why the git repos are not visible over https.
